

HR Admin Guide

HRMS Mobile Application · The whole company's people, attendance, leave, pay and papers.

Whhoohh Path LLP · Android & iOS · Version 1.0 · 8 September 2026

1 What You Can Do

Your HR team. You can do everything an employee can, and everything below on top.

Feature	What it means for you
Add and manage people	Create an employee and their login in one step. Set their role, department, designation, reporting manager and status.
Decide leave	See every pending request in the company. Approve with an optional note, or refuse with a reason the employee reads.
See the whole floor	Attendance for every employee on any date, with Present / Absent / On Leave totals.
Run payroll	Set salary structures, then generate payslips for everyone in one action.
Issue letters	Offer, joining, experience, relieving and employment certificates — from the phone or the portal.
Publish policies	Write and revise the policies every employee reads in the app.
Manage assets	Record laptops and equipment, hand them out, take them back.
Run recruitment	Candidates, interviews and their outcomes.
Pull reports	Seven company reports, each downloadable as a spreadsheet.
Set up the structure	Departments, designations, company email settings, and the audit log.

WHAT IS NOT YOURS

Edit the company name and address — that is the Founder's.

Approve the bank account salaries are paid from. You may enter it; somebody else signs it off.

2 Getting Started

Do this once. It takes about two minutes.

1. Install the app from the link your administrator sends you.
2. Before you open it, make sure your phone has a screen lock (PIN, pattern or face) and at least one fingerprint saved in the phone's own settings. The app needs both.
3. Open the app. Type the email address your administrator created for you, and the temporary password they gave you.
4. Tap the eye icon to check what you have typed, then tap Sign in.

- Go to the Check in tab and tap "Set up biometric check-in". Confirm with your fingerprint. You will not have to do this again on this phone.
- Open the Portal tab → your name at the top right → Profile → Change password. Set your own password now.

YOU STAY SIGNED IN

The app remembers you. You will not be asked for a password each morning — only if you sign out, or change phone.

3 Your App

Five tabs run along the bottom of every screen. Whatever you are doing, any part of the app is one tap away.

Tab	What it is for
Home	Today at a glance — are you clocked in, what is waiting on you, and the latest company notice.
Check in	The fingerprint attendance punch. The screen most people open every morning.
Modules	The grid of modules — everything you look things up in.
Messages	Private one-to-one conversations. A red badge means somebody has written to you.
Portal	The full system on a bigger canvas — payroll, reports, settings and everything not built for a small screen.

The two screens you will use every day

HOME SCREEN
Good morning (your initials) the greeting changes with the time of day · tap the circle for your profile
● Not clocked in In — · Out —
[Check in] the button changes to Check out, then View attendance
Leaves pending Open tasks two count tiles · tap either to open it
Quick actions Attendance · Leave · Payslips · More
Latest announcement the newest company notice, first three lines
Home Check in Modules Messages Portal

Home — everything here is a shortcut. Tap it and the app takes you to the screen that does the work.

CHECK IN SCREEN
Attendance your email · Sign out
Today In 09:14 Out —
[camera preview] your face, if you allowed the camera — the photo attached to the punch
[Check in] green · asks for your fingerprint
[Check out] outlined · greyed until you have checked in
Your face and fingerprint stay on this phone.
Home Check in Modules Messages Portal

Check in — the green button asks for your fingerprint; the photo is taken only after it passes.

4 Your Modules

Tap the Modules tab. These are the tiles you will see — found by colour and shape rather than read top to bottom. Tap one and it opens a list; tap < Back to return here.

People	Tasks	Leaves	Payslips
Projects	Attendance	Reporting Mgr	Assets
Policies	Letters	Calendar	Notices

The module grid, four tiles across, as it appears for your role.

Every module opens the same way: a search box at the top, then rows. Type to narrow the list, pull down to refresh, and tap < Back to leave. Read one and you have read them all.

5 How To Do Each Thing

1. Approve or refuse leave, from your phone

1. Tap Modules, then the amber Leaves tile. Every request in the company is here.
2. Look for amber "pending" badges — those are waiting on you.
3. Tap the row. Read who asked, the type, the dates and how many days.
4. Tap Approve or Reject.
5. Write the note. Optional on an approval; on a refusal it must be at least ten characters, and the employee reads it.
6. Tap Send. The badge turns green or red.

You can do the same at a desk: Portal → Leaves → Approvals, which shows a count of what is waiting.

2. Add a new employee

1. Open the Portal tab → Employees → Add Employee.
2. Fill the first name, the email and a temporary password of at least eight characters.
3. Set the joining date, department, designation and reporting manager.
4. Choose the Role — this decides everything the person will be able to reach.
5. Set Status to Active.
6. Fill PAN, Aadhaar and bank details if payroll will run for them.
7. Tap Add employee, then give the person their temporary password and ask them to change it at first sign-in.

Set up your departments and designations first — Portal → Settings. They appear as dropdowns on this form.

3. Run payroll for the month

1. Portal → Payroll. Scroll to Salary Structures and make sure everyone has one — basic, allowances, PF %, ESI % and an effective date.
2. Scroll back up and choose the month and year.
3. Tap Generate Payroll.
4. Check the four summary cards: employees paid, total payout, deductions and gross.

5. Open a payslip with the eye icon and check it before you release the run.

Anyone without a salary structure produces no payslip. If the count looks low, that is why.

4. Issue a letter

1. Tap Modules → Letters → Generate. (Or Portal → Documents → Generate Letter.)
2. Tap the chip for the type: Offer, Joining / Appointment, Experience, Relieving or Employment Certificate.
3. Search for the employee and tap their name.
4. For an offer or joining letter, set the annual CTC — or leave it blank to use their salary structure — and check the probation and notice wording.
5. Tap Generate. The letter opens straight away, numbered and on your letterhead.
6. Tap Share to send it on. The employee also sees it in their own Letters module.

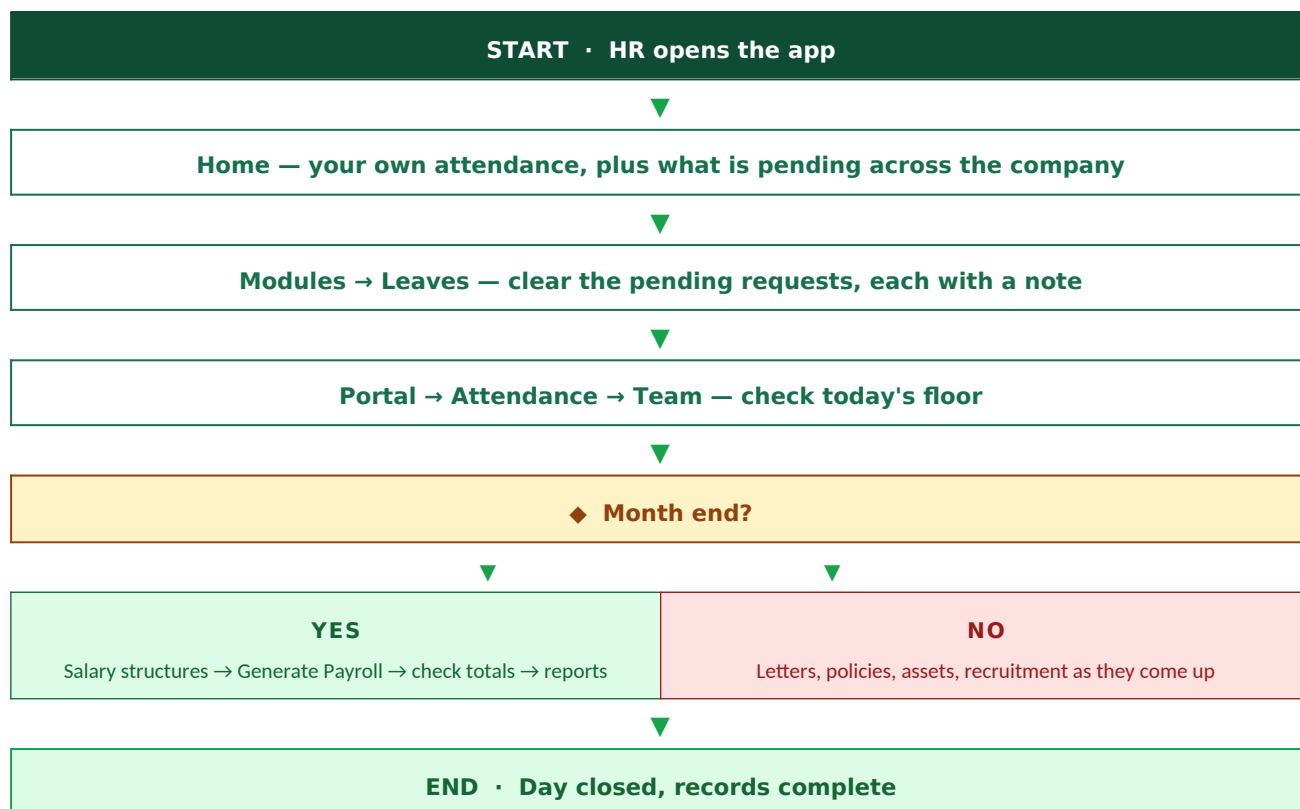

5. See who is in today

1. Portal → Attendance → the Team tab.
2. The date opens on today; change it to look at any other day.
3. Read the line above the table: Present, Absent, On Leave.
4. Scan for amber "Late" badges, and for a dash in the Check Out column — that person did not check out.

6. Close the month

1. Portal → Leaves → All Leaves. Set the month, leave the employee filter on "All employees".
2. Read the four totals and the per-person day counts.
3. Tap Export CSV to hand the figures to finance.
4. Portal → Reports for attendance, leave and payroll summaries — each with its own Download CSV.

6 Your Day, End To End

7 Quick Reference

I want to...	Go here
Approve leave on the move	Modules → Leaves → tap a pending row
Approve leave at a desk	Portal → Leaves → Approvals
Who is in today	Portal → Attendance → Team
Add a new joiner	Portal → Employees → Add Employee
Change somebody's role	Portal → Employees → the person → Edit → Role
Mark a leaver	Portal → Employees → Edit → Status → Exited
Set a salary	Portal → Payroll → Salary Structures
Run payroll	Portal → Payroll → Generate Payroll
Issue a letter	Modules → Letters → Generate
Publish a policy	Portal → Documents → Policies
Give out a laptop	Portal → Assets → the person-plus icon
Post a notice	Portal → Announcements → New Announcement
Pull a report	Portal → Reports → the tab → Download CSV
Add a department or job title	Portal → Settings

If something does not work

What you see	What to do
"Invalid email or password"	Tap the eye icon and check what was typed — the keyboard often capitalises the first letter. If it still fails, your account may not be created yet.
"This account is not active"	Your login works but your record has been switched off. Ask HR.
"Set a screen lock on your phone first"	Add a PIN, pattern or password in your phone's settings, then come back.
"Set up Face ID, Touch ID or a fingerprint first"	Save a fingerprint in your phone's own settings, then come back.
The fingerprint box appears and you close it	Nothing is recorded. Tap Check in again.
A number on Home shows a dash (—)	That one item could not be read. Pull the screen down to refresh.
