

Founder Guide

HRMS Mobile Application · Everything HR can do, plus the company itself.

Whhooohh Path LLP · Android & iOS · Version 1.0 · 8 September 2026

1 What You Can Do

The owner of the company account. The Company Admin role is identical in every respect — anything here is true of both.

Feature	What it means for you
Everything in the HR guide	People, attendance, leave decisions, payroll, letters, policies, assets, recruitment, reports and settings.
Set the company profile	The company name and address. They print on every payslip and every letter you issue.
Approve the payout account	Mark the company bank account verified, so payroll can pay from it.
See the company dashboard	Headcount, present today, on leave, absent, and how the work is moving.
Control roles	Assign any role to any person, and see exactly what each role is granted.
Review the audit log	Who did what, and when.

WHAT IS NOT YOURS

Nothing is withheld from you inside your own company.

2 Getting Started

Do this once. It takes about two minutes.

1. Install the app from the link your administrator sends you.
2. Before you open it, make sure your phone has a screen lock (PIN, pattern or face) and at least one fingerprint saved in the phone's own settings. The app needs both.
3. Open the app. Type the email address your administrator created for you, and the temporary password they gave you.
4. Tap the eye icon to check what you have typed, then tap Sign in.
5. Go to the Check in tab and tap "Set up biometric check-in". Confirm with your fingerprint. You will not have to do this again on this phone.
6. Open the Portal tab → your name at the top right → Profile → Change password. Set your own password now.

YOU STAY SIGNED IN

The app remembers you. You will not be asked for a password each morning — only if you sign out, or change phone.

3 Your App

Five tabs run along the bottom of every screen. Whatever you are doing, any part of the app is one tap away.

Tab	What it is for
Home	Today at a glance — are you clocked in, what is waiting on you, and the latest company notice.
Check in	The fingerprint attendance punch. The screen most people open every morning.
Modules	The grid of modules — everything you look things up in.
Messages	Private one-to-one conversations. A red badge means somebody has written to you.
Portal	The full system on a bigger canvas — payroll, reports, settings and everything not built for a small screen.

The two screens you will use every day

HOME SCREEN
Good morning (your initials) the greeting changes with the time of day · tap the circle for your profile
● Not clocked in In — · Out —
[Check in] the button changes to Check out, then View attendance
Leaves pending Open tasks two count tiles · tap either to open it
Quick actions Attendance · Leave · Payslips · More
Latest announcement the newest company notice, first three lines
Home Check in Modules Messages Portal

Home — everything here is a shortcut. Tap it and the app takes you to the screen that does the work.

CHECK IN SCREEN
Attendance your email · Sign out
Today In 09:14 Out —
[camera preview] your face, if you allowed the camera — the photo attached to the punch
[Check in] green · asks for your fingerprint
[Check out] outlined · greyed until you have checked in
Your face and fingerprint stay on this phone.
Home Check in Modules Messages Portal

Check in — the green button asks for your fingerprint; the photo is taken only after it passes.

4 Your Modules

Tap the Modules tab. These are the tiles you will see — found by colour and shape rather than read top to bottom. Tap one and it opens a list; tap < Back to return here.

People	Tasks	Leaves	Payslips
Projects	Attendance	Reporting Mgr	Assets

Policies	Letters	Calendar	Notices
-----------------	----------------	-----------------	----------------

The module grid, four tiles across, as it appears for your role.

Every module opens the same way: a search box at the top, then rows. Type to narrow the list, pull down to refresh, and tap < Back to leave. Read one and you have read them all.

5 How To Do Each Thing

1. Set the company up — in order

1. Portal → Settings → Company Profile. Set the company name and registered address exactly as they should print.
2. Portal → Settings → Departments. Add each department.
3. Portal → Settings → Designations. Add each job title.
4. Portal → Employees → Add Employee. Add your people, with roles and reporting managers.
5. Portal → Reports → Reporting Manager. Check nobody is left in the amber "unassigned" group.
6. Portal → Company Bank Details → Add account. Record the payout account and the statutory numbers, then upload your logo and signature.
7. Verify the account (below), then set salary structures and run the first payroll.

Do the company profile before the first payroll. Payslips keep whatever the details were when they were generated.

2. Approve the bank account

1. Portal → Company Bank Details.
2. Find the account with the amber "Unverified" badge.
3. Tap the eye icon to reveal the full account number.
4. Check the number, the IFSC and the holder's name against a statement or a cancelled cheque.
5. Tap Verify. The badge turns green and your name is recorded as the verifier.

HR can enter an account but cannot verify it. That separation is deliberate — the person who types an account is never the only person who confirms it.

3. Change somebody's role

1. Portal → Employees → the person → Edit.
2. Change the Role dropdown.
3. Tap Save changes.
4. Ask them to sign out and back in, so their app picks it up straight away.

The role is the whole of the access decision — there is no per-person override anywhere in the system.

4. Read the company at a glance

1. Open the Portal tab. You land on the company dashboard.
2. Top row: total employees, present today, on leave, absent.
3. Second row: tasks in progress, tasks completed.
4. Tap any card to open the detail behind the number.

6 Your Day, End To End

7 Quick Reference

I want to...	Go here
Company name and address	Portal → Settings → Company Profile
Company dashboard	Portal → Dashboard
Approve the payout account	Portal → Company Bank Details → Verify
Change a role	Portal → Employees → Edit → Role
See what a role is allowed	Portal → Settings → Roles & Permissions
Who did what	Portal → Settings → Audit Logs
Everything else	The HR Admin guide — you have all of it

If something does not work

What you see	What to do
"Invalid email or password"	Tap the eye icon and check what was typed — the keyboard often capitalises the first letter. If it still fails, your account may not be created yet.
"This account is not active"	Your login works but your record has been switched off. Ask HR.
"Set a screen lock on your phone first"	Add a PIN, pattern or password in your phone's settings, then come back.

What you see	What to do
"Set up Face ID, Touch ID or a fingerprint first"	Save a fingerprint in your phone's own settings, then come back.
The fingerprint box appears and you close it	Nothing is recorded. Tap Check in again.
A number on Home shows a dash (—)	That one item could not be read. Pull the screen down to refresh.
