

Company Admin Guide

HRMS Mobile Application · Owner-level control of your company.

Whhooohh Path LLP · Android & iOS · Version 1.0 · 8 September 2026

1 What You Can Do

The person who administers this company account. You hold everything an Employee and an HR Admin hold, and the company-level controls on top.

Feature	What it means for you
Set up the company	The company name and address that print on every payslip and every letter, the departments and the job titles.
Own the people	Create employees and their logins, set roles and reporting lines, put somebody on notice, mark a leaver.
Decide leave	Every pending request in the company, approved with a note or refused with a reason.
See the whole floor	Attendance for every employee on any date, with Present / Absent / On Leave totals.
Run pay	Salary structures, the monthly payroll run, and every payslip.
Approve the payout account	Record the company bank account and mark it verified, so payroll can pay from it.
Issue papers	Offer, joining, experience, relieving and employment certificates, and the policies everyone reads.
See the company	The dashboard, seven reports with spreadsheet export, and the audit log of who did what.

WHAT IS NOT YOURS

Reach any other company on the platform. Your account is bound to this one company and sees nothing outside it.

2 Getting Started

Do this once. It takes about two minutes.

1. Install the app from the link your administrator sends you.
2. Before you open it, make sure your phone has a screen lock (PIN, pattern or face) and at least one fingerprint saved in the phone's own settings. The app needs both.
3. Open the app. Type the email address your administrator created for you, and the temporary password they gave you.
4. Tap the eye icon to check what you have typed, then tap Sign in.
5. Go to the Check in tab and tap "Set up biometric check-in". Confirm with your fingerprint. You will not have to do this again on this phone.
6. Open the Portal tab → your name at the top right → Profile → Change password. Set your own password now.

YOU STAY SIGNED IN

The app remembers you. You will not be asked for a password each morning — only if you sign out, or change phone.

3 Your App

Five tabs run along the bottom of every screen. Whatever you are doing, any part of the app is one tap away.

Tab	What it is for
Home	Today at a glance — are you clocked in, what is waiting on you, and the latest company notice.
Check in	The fingerprint attendance punch. The screen most people open every morning.
Modules	The grid of modules — everything you look things up in.
Messages	Private one-to-one conversations. A red badge means somebody has written to you.
Portal	The full system on a bigger canvas — payroll, reports, settings and everything not built for a small screen.

The two screens you will use every day

HOME SCREEN
Good morning (your initials) the greeting changes with the time of day · tap the circle for your profile
● Not clocked in In — · Out —
[Check in] the button changes to Check out, then View attendance
Leaves pending Open tasks two count tiles · tap either to open it
Quick actions Attendance · Leave · Payslips · More
Latest announcement the newest company notice, first three lines
Home Check in Modules Messages Portal

Home — everything here is a shortcut. Tap it and the app takes you to the screen that does the work.

CHECK IN SCREEN
Attendance your email · Sign out
Today In 09:14 Out —
[camera preview] your face, if you allowed the camera — the photo attached to the punch
[Check in] green · asks for your fingerprint
[Check out] outlined · greyed until you have checked in
Your face and fingerprint stay on this phone.
Home Check in Modules Messages Portal

Check in — the green button asks for your fingerprint; the photo is taken only after it passes.

4 Your Modules

Tap the Modules tab. These are the tiles you will see — found by colour and shape rather than read top to bottom. Tap one and it opens a list; tap < Back to return here.

People	Tasks	Leaves	Payslips
Projects	Attendance	Reporting Mgr	Assets
Policies	Letters	Calendar	Notices

The module grid, four tiles across, as it appears for your role.

Every module opens the same way: a search box at the top, then rows. Type to narrow the list, pull down to refresh, and tap < Back to leave. Read one and you have read them all.

5 How To Do Each Thing

1. Set the company up — do these in order

1. Portal → Settings → Company Profile. Company name and registered address, exactly as they should print on payslips and letters.
2. Portal → Settings → Departments. Add each one.
3. Portal → Settings → Designations. Add each job title.
4. Portal → Employees → Add Employee. Add your people, with their roles, reporting managers and joining dates.
5. Portal → Reports → Reporting Manager. Check nobody sits in the amber "unassigned" group.
6. Portal → Company Bank Details → Add account. Record the payout account, the GST, PAN, TAN, PF and ESI numbers, then upload your logo and signature.
7. Verify the account, set salary structures, and run the first payroll against your existing figures before you rely on it.

Company profile first. Payslips and letters keep whatever the company details were at the moment they were generated.

2. Add a person and give them the right reach

1. Portal → Employees → Add Employee.
2. First name, email, and a temporary password of at least eight characters.
3. Joining date, department, designation, reporting manager.
4. Choose the Role. This one field decides everything the person will be able to open — there is no per-person override anywhere.
5. Status → Active. Fill PAN, Aadhaar and bank details if they are to be paid.
6. Tap Add employee, then give them the temporary password and ask them to change it at first sign-in.

3. Approve the payout bank account

1. Portal → Company Bank Details.
2. Find the account carrying the amber "Unverified" badge.
3. Tap the eye icon to reveal the full account number.
4. Check the number, the IFSC and the holder's name against a statement or a cancelled cheque.
5. Tap Verify. The badge turns green and your name is recorded as the verifier.

HR can enter an account but cannot verify it. The person who types an account is never the only person who confirms it.

4. Read the company at a glance

1. Open the Portal tab. You land on the company dashboard.
2. Top row: total employees, present today, on leave, absent.
3. Second row: tasks in progress, tasks completed.
4. Tap any card to open the detail behind the number.
5. Portal → Settings → Audit Logs shows who changed what, and when.

6 Your Day, End To End

7 Quick Reference

I want to...	Go here
Company name and address	Portal → Settings → Company Profile
Add a department or job title	Portal → Settings
Add a new joiner	Portal → Employees → Add Employee
Change somebody's role	Portal → Employees → Edit → Role
Mark a leaver	Portal → Employees → Edit → Status → Exited
Approve leave	Modules → Leaves, or Portal → Leaves → Approvals
Who is in today	Portal → Attendance → Team
Run payroll	Portal → Payroll → Generate Payroll
Approve the payout account	Portal → Company Bank Details → Verify
Issue a letter	Modules → Letters → Generate
Pull a report	Portal → Reports → Download CSV

I want to...	Go here
See who did what	Portal → Settings → Audit Logs

If something does not work

What you see	What to do
"Invalid email or password"	Tap the eye icon and check what was typed — the keyboard often capitalises the first letter. If it still fails, your account may not be created yet.
"This account is not active"	Your login works but your record has been switched off. Ask HR.
"Set a screen lock on your phone first"	Add a PIN, pattern or password in your phone's settings, then come back.
"Set up Face ID, Touch ID or a fingerprint first"	Save a fingerprint in your phone's own settings, then come back.
The fingerprint box appears and you close it	Nothing is recorded. Tap Check in again.
A number on Home shows a dash (—)	That one item could not be read. Pull the screen down to refresh.
