

Project Manager Guide

HRMS Mobile Application · Projects and the work inside them.

Whhooohh Path LLP · Android & iOS · Version 1.0 · 8 September 2026

1 What You Can Do

Whoever runs delivery. You have everything in the Employee guide, plus the project and task controls below.

Feature	What it means for you
Create and edit projects	Name, description, technologies, priority, status, deadline and progress.
Staff a project	Add and remove members from the project's own Members tab.
Own the task board	Create, delete, reassign and re-prioritise any task in the company.
Book time in the calendar	Create meetings, reviews and deadlines.
See the company dashboard	Headcount, attendance summary and task throughput.

WHAT IS NOT YOURS

Add, edit or delete an employee record — you see the directory as any employee does.
Approve or refuse leave, see the whole company's attendance, or run payroll.
Issue letters, edit policies, or open Reports and Settings.

2 Getting Started

Do this once. It takes about two minutes.

1. Install the app from the link your administrator sends you.
2. Before you open it, make sure your phone has a screen lock (PIN, pattern or face) and at least one fingerprint saved in the phone's own settings. The app needs both.
3. Open the app. Type the email address your administrator created for you, and the temporary password they gave you.
4. Tap the eye icon to check what you have typed, then tap Sign in.
5. Go to the Check in tab and tap "Set up biometric check-in". Confirm with your fingerprint. You will not have to do this again on this phone.
6. Open the Portal tab → your name at the top right → Profile → Change password. Set your own password now.

YOU STAY SIGNED IN

The app remembers you. You will not be asked for a password each morning — only if you sign out, or change phone.

3 Your App

Five tabs run along the bottom of every screen. Whatever you are doing, any part of the app is one tap away.

Tab	What it is for
Home	Today at a glance — are you clocked in, what is waiting on you, and the latest company notice.
Check in	The fingerprint attendance punch. The screen most people open every morning.
Modules	The grid of modules — everything you look things up in.
Messages	Private one-to-one conversations. A red badge means somebody has written to you.
Portal	The full system on a bigger canvas — payroll, reports, settings and everything not built for a small screen.

The two screens you will use every day

HOME SCREEN
Good morning (your initials) the greeting changes with the time of day · tap the circle for your profile
● Not clocked in In — · Out —
[Check in] the button changes to Check out, then View attendance
Leaves pending Open tasks two count tiles · tap either to open it
Quick actions Attendance · Leave · Payslips · More
Latest announcement the newest company notice, first three lines
Home Check in Modules Messages Portal

Home — everything here is a shortcut. Tap it and the app takes you to the screen that does the work.

CHECK IN SCREEN
Attendance your email · Sign out
Today In 09:14 Out —
[camera preview] your face, if you allowed the camera — the photo attached to the punch
[Check in] green · asks for your fingerprint
[Check out] outlined · greyed until you have checked in
Your face and fingerprint stay on this phone.
Home Check in Modules Messages Portal

Check in — the green button asks for your fingerprint; the photo is taken only after it passes.

4 Your Modules

Tap the Modules tab. These are the tiles you will see — found by colour and shape rather than read top to bottom. Tap one and it opens a list; tap < Back to return here.

People	Tasks	Leaves	Payslips
Projects	Attendance	Assets	Policies

		
Letters	Calendar	Notices

The module grid, four tiles across, as it appears for your role.

Every module opens the same way: a search box at the top, then rows. Type to narrow the list, pull down to refresh, and tap < Back to leave. Read one and you have read them all.

5 How To Do Each Thing

1. Start a project

1. Portal → Projects → New Project.
2. Name it — this is what appears in every list, on the phone and in the portal.
3. Write a description. Its first line is the row subtitle in the app, so make it meaningful.
4. List the technologies, separated by commas.
5. Set the priority, the status and the deadline.
6. Tap Create project, then open it and add members from the Members tab.

2. Put work on the board

1. Portal → Tasks → New Task.
2. Write a specific title — it is the row title on everyone's phone.
3. Attach it to the project and choose the assignee.
4. Set the priority and the due date.
5. Leave the status at Assigned. Tap Create task.

An unassigned task appears in the list but in nobody's Open tasks count.

3. Keep the board moving

1. Portal → Tasks. Filter by status if the list is long.
2. Tap a task to open it: change the status, the priority, the project or the assignee.
3. Use the checklist inside a task to break it down, and the comments to discuss it.
4. On the phone, Modules → Tasks lets you move any task one step along — assigned → in progress → review → completed.

6 Your Day, End To End

7 Quick Reference

I want to...	Go here
Create a project	Portal → Projects → New Project
Add somebody to a project	Portal → Projects → the project → Members
Create a task	Portal → Tasks → New Task
Reassign a task	Portal → Tasks → the task → Assignee
Move a task along, on the phone	Modules → Tasks → tap the row
Book a review	Portal → Calendar → New Event
Everything personal	The Employee guide

If something does not work

What you see	What to do
"Invalid email or password"	Tap the eye icon and check what was typed — the keyboard often capitalises the first letter. If it still fails, your account may not be created yet.
"This account is not active"	Your login works but your record has been switched off. Ask HR.
"Set a screen lock on your phone first"	Add a PIN, pattern or password in your phone's settings, then come back.
"Set up Face ID, Touch ID or a fingerprint first"	Save a fingerprint in your phone's own settings, then come back.
The fingerprint box appears and you close it	Nothing is recorded. Tap Check in again.
A number on Home shows a dash (—)	That one item could not be read. Pull the screen down to refresh.
