

Platform Administrator Guide

HRMS Mobile Application · Every client company on the platform, and the way into any of them.

Whhoohh Path LLP · Android & iOS · Version 1.0 · 8 September 2026

1 What You Can Do

Whoever operates the HRMS itself — not a client company. No customer will ever see this guide or this screen.

Feature	What it means for you
See every company	One row per client, with their plan, headcount, payslip count, pending leave, last sign-in and status.
Read the platform totals	Companies, active companies, employees across all of them, and subscriptions.
Spot a customer in trouble	An amber ⚠️ "never" in Last sign-in is a company provisioned but not started. A climbing Pending count means approvals are not happening.
Open a support session	Enter a customer's account and work in it exactly as their own administrator would.
End a session	Exit from the banner. The console returns and the cached data is cleared.

WHAT IS NOT YOURS

Work invisibly. Opening a company shows an amber banner on every screen — theirs as well as yours — and every action is recorded against your account.

See inside a company from the console. The list carries counts, never anybody's attendance, pay or messages.

Mark attendance, apply for leave or hold a payslip. You belong to no company, so you have none of those.

2 Getting Started

You are not an employee of any company, so there is no fingerprint to enrol and no attendance to mark.

1. Install the app, or open the portal in a browser — either works, and the console is the same in both.
2. Sign in with your platform administrator account.
3. You land on the console rather than a company dashboard. That is how you know the account is right.
4. Change your password: Portal → your name at the top right → Profile → Change password.

NOTHING YOU DO HERE IS INVISIBLE

Opening a company starts a recorded support session. An amber banner names the company on every screen — yours and theirs — and every action inside is attributed to your account.

3 Your App

You sign in through the same app as everybody else, but you belong to no company — so you land on the platform console rather than on a company's Home screen. Your work is in the Portal tab.

Tab	What it is for
Home	Little use to you — you have no attendance, leave or payslips of your own.
Check in	Not for you. You are not an employee of any company on the platform.
Modules	Little use to you, for the same reason.
Messages	Only inside a support session, with people in that company.
Portal	Where you work. The console, and every company you open from it.

The two screens you will use every day

PLATFORM CONSOLE
Platform every company on this HRMS
Companies Active Employees Subscriptions four totals across the platform
Search companies... matches name, code and email
Acme Textiles · ACM Plan · 84 employees · 84 payslips · 3 pending · last sign-in today
Beta Foods · BTA ⚠ never signed in — provisioned but not started
Ceylon Motors · CYL [in support] somebody already has a session open here

The console — every company on the platform, with the four totals above them.

INSIDE A COMPANY
SUPPORT MODE × Exit You are inside Acme Textiles. Everything you do here is recorded against your account.
Dashboard the company's own screens, exactly as their admin sees them
Employees · Attendance · Leaves · Payroll their navigation, their data
Reports · Settings everything an administrator of that company can reach
The banner cannot be closed the only way to remove it is to end the session

Inside a company — the amber banner is on every screen until you end the session.

4 The Company List

Every client company on the platform, one row each. The columns are chosen so a company in trouble is visible without opening it.

Column	What to look for
Company	Name, short code and contact email. The coloured dot is their brand colour.
Plan	Which subscription they are on.
Employees	How many people they have loaded, against their limit where one applies.
Payslips	How many payslips exist. Zero means they have never run payroll.

Column	What to look for
Pending	Leave requests waiting on somebody. A number that keeps climbing means approvals are not happening.
Last sign-in	An amber ⚠️ "never" is the row worth acting on — provisioned, but nobody has started.
Status	active (green) · trial (amber) · suspended (red) · inactive (grey).

THESE ARE TOTALS, NOT CONTENTS

The console shows counts. It does not show anybody's attendance, pay or messages. To see inside a company you open a support session, and that is recorded.

5 How To Do Each Thing

1. Find a company

1. Portal → the console. You land here whenever no session is open.
2. Type into "Search companies..." — it matches the name, the short code and the contact email.
3. Read the row: plan, employees, payslips, pending leave, last sign-in, status.

2. Check on a new subscriber

1. Scan the Last sign-in column for the amber ⚠️ "never".
2. That company has been provisioned but nobody has opened the app.
3. Check the Employees column: zero means their people were never loaded.
4. Check Payslips: zero means they have not run payroll yet.
5. Contact them, or open a session and finish the set-up with them.

This is the single most useful column on the console. A customer who never signs in is a subscription about to lapse.

3. Open a support session

1. Find the company and tap Manage.
2. Wait for "Support session opened". The cached data is cleared and you land on that company's dashboard.
3. An amber SUPPORT MODE banner now sits on every screen, naming the company.
4. Do only what the customer asked for.
5. Tap Exit on the banner when you are done.

A company already carrying a life-buoy icon and an "in support" badge has somebody else inside it. Check before you open a second session.

4. Set a new company up

1. Open a support session in the new company.
2. Settings → Company Profile: their name and registered address.
3. Settings → Departments and Designations.
4. Employees → Add Employee: load their people, with roles.
5. Company Bank Details: record and verify the payout account.
6. Settings → Email / SMTP: their outbound mail, then send a test.
7. Exit the session and hand them the role guides.

6 Your Day, End To End

7 Quick Reference

I want to...	Go here
See every company	Portal → the console
Find one company	Search companies... — name, code or email
Who has never started	The amber ⚠ "never" in Last sign-in
Who is not approving leave	A climbing Pending count
Who has not run payroll	Payslips column at zero
Go inside a company	Manage on that row
Leave a company	Exit on the amber banner
What to do once inside	The Company Admin guide

If something does not work

What you see	What to do
"Invalid email or password"	Tap the eye icon and check what was typed — the keyboard often capitalises the first letter. If it still fails, your account may not be created yet.
"This account is not active"	Your login works but your record has been switched off. Ask HR.
"Set a screen lock on your phone first"	Add a PIN, pattern or password in your phone's settings, then come back.
"Set up Face ID, Touch ID or a fingerprint first"	Save a fingerprint in your phone's own settings, then come back.
The fingerprint box appears and you close it	Nothing is recorded. Tap Check in again.
A number on Home shows a dash (—)	That one item could not be read. Pull the screen down to refresh.
