

Employee — Step by Step

Whhooohh Path HRMS mobile application · from first sign-in to end of day

18 operations · every screen an employee can open · 10 September 2026

This covers one role only: Employee. Anything a manager, HR or the founder does is in the guide for that role. Operations 1 to 4 happen once. Operations 5 to 7 are the daily routine. The rest are the features an employee holds, and can be read in any order.

Where everything lives

Five tabs along the bottom of the screen. Nothing else is hidden anywhere.

Tab	What it is for
Home	Today at a glance — attendance, leave and task counts, quick actions, your schedule, the latest announcement
Check in	Checking in and out with your fingerprint or face, and enrolling this phone the first time
Modules	Eleven lists: leaves, payslips, tasks, attendance, people, projects, assets, policies, letters, calendar, announcements
Messages	Messaging colleagues inside the HRMS, with an unread count on the tab
Portal	The full web HRMS carried inside the app, already signed in

Tapping your initials at the top right of Home opens your profile from anywhere.

Part 1 · The first time

1 Open the app

Phone home screen

1. Find the HRMS icon on your phone and tap it.
2. Wait for the splash screen to finish.

YOU SHOULD NOW SEE The sign-in screen, with fields for email and password.

2 Sign in

Sign-in screen

1. Type your work email address — the one your company created for you.
2. Type your password.
3. Tap the eye icon if you want to check what you typed.
4. Tap Sign in.

YOU SHOULD NOW SEE The Home tab, with your email at the top.

NOTE You do this once. The session is kept on the phone, so tomorrow the app opens straight on Home. You are only asked again if you sign out, or if the session expires.

3 If you have forgotten your password

Sign-in screen

1. Tap Forgot password, under the Sign in button.
2. Type your work email address.
3. Tap Send.
4. Open the email and follow the link.

YOU SHOULD NOW SEE A message confirming where the reset was sent.

NOTE The email arrives from your own company's address, not from Whhoohh Path. Check spam if it has not arrived in a few minutes.

4 Set this phone up for check-in

Profile · once per phone

1. Tap your initials at the top right of Home.
2. Look for the device row. It will say "Not set up for you".
3. Tap Set up.
4. Complete your phone's fingerprint or face prompt when it appears.
5. Close the sheet.

YOU SHOULD NOW SEE The device row reading "Set up for your check-in".

NOTE Your phone must already have a fingerprint or face registered AND a screen lock (PIN, pattern or password). Without a screen lock the app cannot store the key safely and will refuse. This is done once per phone — if you change handset, do it again on the new one.

Part 2 · Every day

5 Check in

Home · or the Check in tab

1. Open the app. The card on Home reads “Not clocked in”.
2. Tap Check In on that card.
3. Your phone raises its own fingerprint or face prompt. Complete it.
4. Allow the camera and location when the phone asks.
5. The verification screen opens. Take your selfie.
6. Wait a moment for the login place to turn into an address.
7. Tap Confirm.

YOU SHOULD NOW SEE A confirmation saying you are checked in, and what was recorded with it.

NOTE The fingerprint is required. The selfie and the location are not — decline either and your attendance is still recorded; the confirmation tells you which of the two was kept.

6 Check out

Home · or the Check in tab

1. Open the app at the end of your day.
2. Tap Check Out on the card.
3. Complete the fingerprint or face prompt.
4. Take the selfie and tap Confirm.

YOU SHOULD NOW SEE The card showing both your in and out times, and the day closed.

NOTE One check-in and one check-out per day. Once both are recorded the card changes to “View attendance”.

7 See your attendance history

Home → Attendance

1. On Home, tap Attendance under Quick actions.
2. Scroll the list. The newest day is at the top.
3. Use the search box to find a particular date.

YOU SHOULD NOW SEE Every day you have worked, with in and out times and hours.

NOTE You see your own record and nobody else's. If a day looks wrong, raise it with HR — an employee cannot edit attendance.

Part 3 · Everything else you can do

8 Apply for leave

Modules → Leaves

1. Open the Modules tab and tap Leaves.
2. Tap Apply at the top of the screen.
3. Choose the leave type from the list your company has set up.
4. Set the start date and the end date, in the format YYYY-MM-DD.
5. Type a reason if you want to — it is optional.
6. Tap Send.

YOU SHOULD NOW SEE Your request at the top of the list, marked pending.

NOTE Your balance is checked at the moment you send. If you do not have enough days, or the end date is before the start date, you are told straight away with the actual reason — nothing is submitted.

9 See a decision on your leave

Modules → Leaves

1. Open Modules → Leaves.
2. Find your request in the list.
3. Read the badge on the right: pending, approved or rejected.

YOU SHOULD NOW SEE The decision, and — if it was rejected — the reason your manager wrote, in the same row.

NOTE You do not need to ask anyone why. The reason is written when the decision is made, and it appears here.

10 Read a payslip

Modules → Payslips

1. Open Modules → Payslips.
2. Find the month you want — the newest is at the top.
3. Tap the row to open it.

YOU SHOULD NOW SEE The month, your gross pay and your net pay.

NOTE Yours only. A payslip appears here as soon as HR issues it; there is nothing to request.

11 Work your tasks

Modules → Tasks

1. Open Modules → Tasks. Everything assigned to you is listed, with its project.
2. Tap a task to open it.
3. Move it along, and report how far it has got.

YOU SHOULD NOW SEE The task with its new status, and the list updated behind it.

NOTE You can move a task along and report progress. Re-scoping a task or handing it to somebody else is your manager's — those options are simply not offered to you.

12 Look somebody up

Modules → People

1. Open Modules → People.
2. Type a name in the search box.
3. Tap the row to see their details.

YOU SHOULD NOW SEE Their name, designation and work email.

NOTE The company directory only. Salary, bank details, PAN and Aadhaar are not readable by an employee anywhere in the app.

13 Check the equipment issued to you

Modules → Assets

1. Open Modules → Assets.
2. Read the list — each row is one item, with its category and serial number.

YOU SHOULD NOW SEE Every laptop, phone or other item recorded against your name.

NOTE This is what your company has on record. If something is missing or wrong, tell HR — you cannot change it here.

14 Read a policy, the calendar, or an announcement

Modules

1. Open Modules.
2. Tap Policies for the company handbook, Calendar for holidays and events, or Announcements for company notices.
3. Tap any row to read the full text.

YOU SHOULD NOW SEE The document, holiday list or notice in full.

NOTE The latest announcement also appears at the bottom of your Home screen, so you rarely need to go looking for it.

15 Open one of your HR letters

Modules → Letters

1. Open Modules → Letters.
2. Find the letter you need — offer, joining, experience, relieving or employment certificate.
3. Tap the row to open the document.
4. Use your phone's share option to send it on.

YOU SHOULD NOW SEE The letter as it was issued, with its reference number.

NOTE You can open and share your own letters. Issuing a letter is HR's — you will not see a Generate button.

16 Message a colleague

Messages tab

1. Open the Messages tab.
2. Pick a conversation, or start a new one from the contact list.
3. Type your message and send it.
4. Press and hold your own message to edit or delete it.

YOU SHOULD NOW SEE Your message in the thread, and the unread badge cleared.

NOTE The badge on the tab counts unread messages whether or not the screen is open, so you do not miss one.

17 Use the full HRMS on the phone

Portal tab

1. Open the Portal tab.
2. Wait for it to load — it opens already signed in.
3. Use it as you would in a browser.

YOU SHOULD NOW SEE The web HRMS inside the app, with no second sign-in.

NOTE Same account and same permissions as the rest of the app. This is also where you change your password: Profile → Change password.

18 Your profile, and signing out

Profile

1. Tap your initials at the top right of Home.
2. Read your details: employee code, designation, department, joining date and phone.
3. The enrolled phone is listed here — tap Remove if you are changing handset.
4. Tap Sign out when you want to leave.

YOU SHOULD NOW SEE Either your own details, or the sign-in screen after signing out.

NOTE Removing the device only removes it from this phone. You can set it up again at any time — see operation 4.

What an employee cannot do

Not because the buttons are hidden, but because the system refuses. Knowing this saves asking.

You cannot	Who does it instead
Edit or correct your own attendance	HR, from the web portal
Approve or reject leave — yours or anyone's	Your reporting manager, or HR
See another employee's payslip, salary, PAN, Aadhaar or bank details	Nobody but HR, and the person themselves
Issue a letter or certificate	HR, Company Admin or the Founder
Add a person, a project, an asset or a policy	HR, or the relevant manager
Reassign a task or change its scope	The project manager or team lead
Run payroll or open a company report	HR, Accounts Manager or the Founder

Every one of these is refused by the database, not by the screen. So the answer is the same whichever way it is asked — from the app, from the web, or from anywhere else.

☰ One-page reference

I want to...	Go to
Check in or out	Home → the card at the top, or the Check in tab
See my hours this month	Home → Attendance
Apply for leave	Modules → Leaves → Apply
Find out if my leave was approved	Modules → Leaves
Read my payslip	Modules → Payslips
See what I am working on	Modules → Tasks, or the counter on Home
Find a colleague's email	Modules → People
See the laptop issued to me	Modules → Assets
Read a company policy	Modules → Policies
Check the holiday list	Modules → Calendar, or My Schedule on Home
Read the latest notice	Bottom of Home, or Modules → Announcements
Get my offer or experience letter	Modules → Letters
Message someone	Messages tab
Change my password	Portal tab → Profile → Change password
Set up a new phone	Profile → Set up
Sign out	Profile → Sign out
